Subject: US 181 Harbor Bridge Project, Corpus Christi, TX

All,  
The US 181 Harbor Bridge project will replace the existing bridge across the Port of Corpus Christi Ship Channel with a new bridge. The Federal Highway Administration (FHWA) and TxDOT has requested a meeting to provide EPA with an overview of the project, discuss coordination between our agencies, and to identify significant issues to be addressed in the draft EIS. If you are aware of any significant issues or are currently doing any work in the Corpus area, please provide that kind of information.  
Please review the attachment for a brief history of the project, the draft purpose and need, and for the preliminary alternatives. We will provide the meeting date as soon as its established (sometime in October) and look forward to seeing you or your designated staff.  
(See attached file: *US 181 package.pdf*)

Thank you,  
John MacFarlane
